Collisions

The Origins of the War in Ukraine and the New Global Instability by Michael Kimmage

MICHAEL KIMMAGE, Professor of History, Catholic University of America

In this vividly written, narrative history of the war in Ukraine, Michael Kimmage puts together the pieces of a complicated international puzzle to understand the origins of the current conflict that has brought the world to the brink of a new Cold War.

Tracing the development of Ukraine and Russia's fractious relationship back to the end of the Cold War, this book takes readers through the central events that led to Vladimir Putin seizing the Crimea in 2014 and, eight years later, initiating arguably the most intensive military conflict of the entire post-World War II era.

An authoritative interpretation of possibly the most important geopolitical event of the post-Cold War era, *Collisions* is essential reading for anyone interested in the origins of this epochal conflict and its ripple effects across the globe.

- Provides an account of the war's global dimensions, from Russia to Ukraine, to Europe, to the United States, and beyond.
- Explains how Ukraine went from an embattled country on the edge of Europe to a formidable military power capable of pushing back the Russian military.
- Captures how the current war has transformed multiple centers of power and dramatically altered the path of globalization itself.

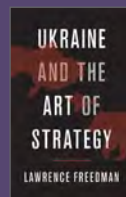

"Essential reading for those seeking to understand what went wrong after the collapse of the USSR."

Angela Stent, Author of *Putin's World: Russia Against the West and with the Rest*

People, Power, Change

Organizing for Democratic Renewal

MARSHALL GANZ, Rita T. Hauser Senior Lecturer in Leadership, Organizing, and Civil Society, Harvard Kennedy School

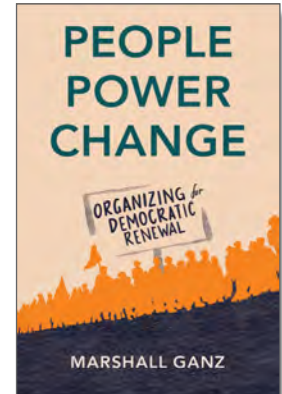

- Explains how ordinary people can work together to turn the resources they have into the power they need to achieve real change in their lives.
- Explores the forces, craft, and learned skill of organising and provides an actionable framework.
- Highlights the authors personal experiences from a lifetime of organising in iconic social movements and campaigns.
- Illustrates how collective action works, and how to build the practices and skills to do it with intention and success.

City of Equals

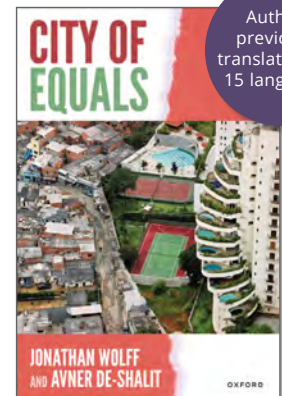

JONATHAN WOLFF, Professor of Values and Public Policy, Blavatnik School of Government, University of Oxford, and **AVNER DE SHALIT**, Professor of Democracy and Human Rights, The Hebrew University of Jerusalem

- Provides a comprehensive philosophical theory about equality in the city.
- Describes what a city of equals will look like and how we can move towards making our cities more egalitarian.
- Brings together an account of a city of equals based on four underlying values which seek to give each of its citizens a secure sense of place or belonging.
- Argues that how people feel treated by the city and those around them, and whether they can live according to their values, are much more central to equality than the divide between rich and poor.

The Death of Expertise

The Campaign against Established Knowledge and Why it Matters
Second Edition

TOM NICHOLS, Professor Emeritus at the US Naval War College

Building on his successful first edition, Tom Nichols confirms his thesis that recent events, such as the COVID-19 pandemic, prove that the assault on expertise has only intensified.

This second edition addresses how technology and increasing levels of education have exposed people to more information than ever before, but have also helped to fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Nichols highlights how the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement, bringing democratic institutions in danger of falling either to populism or to technocracy or, in the worst case, a combination of both.

- A fully updated indictment of the many forces continuing to undermine the authority of experts, with a new chapter on the COVID-19 pandemic.
- Ties the rise of anti-expertise sentiment and anti-intellectualism not only to the pervasiveness of the internet, but to the rise in populism and conspiratorial thinking.
- Examines the changes in the relationship between citizens, experts, and policymakers over the past several years.

Upstart

How China became a Great Power

ORIANA SKYLAR MASTRO, Center Fellow at the Freeman Spogli Institute for International Studies

- Discusses how China managed to build power from a weaker resource position in an international system that was dominated by the US.
- Demonstrates that China was able to climb to great power status through a careful mix of strategic emulation, exploitation, and entrepreneurship on the international stage.
- Explains the unique nature of China's rise and provides policy guidance for this new era of great power competition.

"A must read. Mastro provides a new way to understand how China has built its national power over the past thirty years."

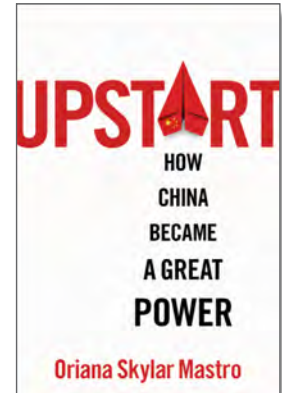

Stephen Hadley, former National Security Advisor of the United States

Don't Take it Personally

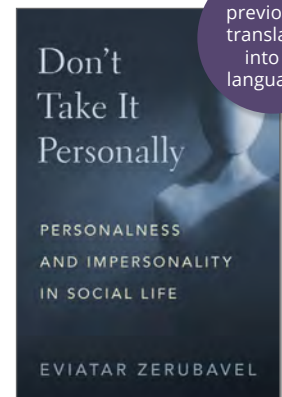

Personalness and Impersonality in Social Life

EVIATAR ZERUBAVEL, Professor of Sociology Emeritus, Rutgers University

- Addresses the fundamental distinction between the specific and generic visions of personhood.
- Articulates the core features of impersonality: the ability to think beyond individuals and see them as members of particular social categories.
- Considers what is gained and what is lost by impersonalising so much of social life.
- Draws upon fascinating examples from diverse social contexts, such as racial profiling and hate crimes.

Who's Afraid of the Welfare State Now?

ANTON HEMERIJCK, Professor of Political Science and Sociology, European University Institute, and **MANOS MATSAGANIS**, Professor of Public Finance, Polytechnic University of Milan

The 2008 crash marked a critical stress test for European welfare states with dramatic repercussions, including a massive surge in unemployment, a widening in wage and income disparities, and rising poverty. This book explores the welfare-policy responses to the Great Recession, examining reform trajectories that swept across Europe over the last decade, and highlighting how the overall scope of welfare-policy responses has been heterogeneous, disparate, and uneven.

Who's Afraid of the Welfare State Now? argues that the future of work and welfare is in our hands, and that it is possible to provide inclusive social security, achieve high employment, advance and maintain human capabilities across the life-course, and fight poverty and inequality.

- Shows how work and welfare can be shaped to provide inclusive social security and fight poverty and inequality.
- Describes attempts to rebuild social programmes and institutions.
- Includes a chapter on COVID-19 welfare management.

“A timely and much needed demonstration of the essential role that welfare states can play in advanced knowledge-based economies.”

Giuliano Bonoli, Professor of Social Policy, University of Lausanne

“In times of crises, this comprehensive analysis of welfare states in Europe sheds light on their capacity to buffer social risks and foster societal resilience.”

Bernhard Ebbinghaus, Professor of Sociology, University of Mannheim

The New Roman Empire

A History of Byzantium

ANTHONY KALDELLIS, Professor of Classics, University of Chicago

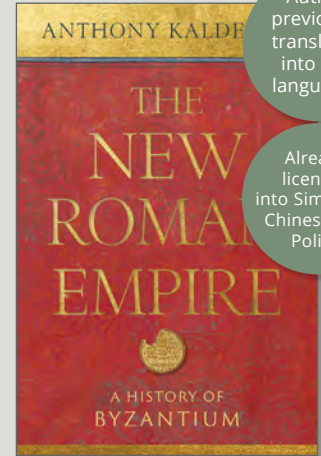

The New Roman Empire is a major history of the eastern Roman Empire, from Constantine to 1453, covering political and military history as well as all the major changes in religion, society, demography, and economy.

Beginning with the foundation of Constantinople in 324 AD, and ending with the fall of the empire to the Ottoman Turks in the fifteenth century, this book incorporates new findings, explains recent interpretive models, and presents well-known historical characters and events in a new light, showing how Byzantium was a vigorous state of its own and a vital node in the first truly globalised world.

- Presents east Roman Orthodox culture as a dynamic field of creative tensions and debate.
- Illustrates contemporary perceptions through the use of striking quotations from primary sources.
- Refutes the traditional image of the Byzantine state as despotic and oppressive, and reveals that its government wanted to be seen as responsive, accountable, and fair to its subjects.

"A compelling and authoritative overview of a millennial empire, filled with unfamiliar and revealing details, that shows how its initial deep foundations enabled Byzantium's extraordinary longevity. Kaldellis's combination of structural analysis, mastery of original sources, and admirable synthesis of challenging issues make this a brilliant guide."

Judith Herrin, author of Ravenna: Capital of Empire, Crucible of Europe

Jerusalem through the Ages

From Its Beginnings to the Crusades

JODI MAGNESS, Kenan Distinguished Professor for Teaching Excellence in Early Judaism, University of North Carolina at Chapel Hill

- A broad yet detailed account of one of the world's oldest and holiest cities.
- An up-to-date and accessible history of Jerusalem from its beginnings through to the medieval period.
- Incorporates the most recent archaeological discoveries and evidence, within a broad temporal framework.
- Focuses on key moments of transition in Jerusalem's long history.

“Authoritative and accessible, *Jerusalem Through the Ages* is a one-stop shop for both the history and archaeology of Jerusalem.”

Eric H. Cline, Author of *1177 B.C.: The Year Civilization Collapsed*

Feminist Lives

Women, Feelings, and the Self in Post-War Britain

LYNN ABRAMS, Professor of Modern History, University of Glasgow

- Bridges the gap between the Second World War and Women's Liberation in respect of women's life experiences.
- Focuses on the 'transition' generation of women who were born in the 1940s and who grew to maturity in the 1950s, 60s, and 70s.
- Highlights women's voices as they describe themselves, their relationships, their feelings and actions.
- Offers a new account of the post-war decades through the first-hand accounts of 'ordinary' women.

Hopped Up

How Travel, Trade, and Taste Made Beer a Global Commodity

JEFFREY M. PILCHER, Professor of History and Food Studies, University of Toronto

- A highly readable narrative of brewing traditions and contemporary production of beer across Europe, North America, Africa, Asia, and Latin America.
- Written by an eminent global historian of food and drink.
- Discusses the role of gender and race in brewing, including among the current generation of craft brewers.
- Highlights local origins and distinctive flavors alongside industrial standardisation.

After the Flying Saucers Came

A Global History of the UFO Phenomenon

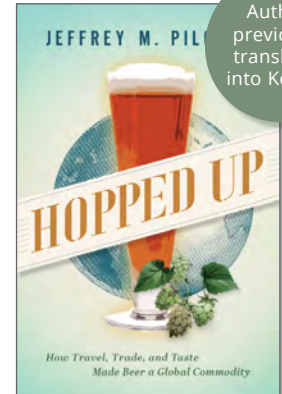

GREG EGHIGIAN, Professor of History and Bioethics, Pennsylvania State University

- Tells the story of the world's fascination with UFO's against the backdrop of the Cold War and the space age.
- Reveals how the phenomenon started in the United States and became a worldwide obsession, featuring descriptions and theories from Europe, Latin America, and Asia.
- Provides historical context for the US government's renewed study of 'unidentified aerial phenomena' (UAP).

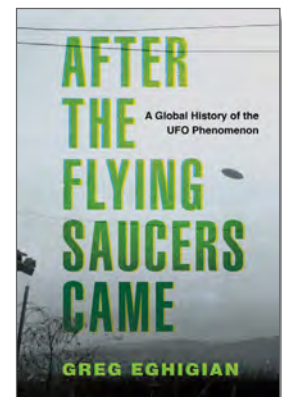

"The most rigorous and compelling account of UFOs' hold on humans."

Sarah Scoles, Author of *They Are Already Here: UFO Culture and Why We See Saucers*

Concentration Camps

A Global History

ALAN KRAMER, Professor Emeritus of Trinity College Dublin

- Integrates a vast amount of research, contemporary documents, and personal accounts.
- Presents a compelling argument, integrating the histories of imperial powers as they produced a uniquely horrifying instrument of repression.
- Examines the motivations of regimes and perpetrators to understand the purposes and shifting functions of the camps.
- Imagines concentration camps through the lens of the victims.

From That Small Island

The Story of the Irish

JANE OHLMEYER, Erasmus Smith's Professor of Modern History at Trinity College Dublin and **BRÍONA NIC DHIARMADA**, Thomas J. and Kathleen O'Donnell Professor Emerita of Irish Studies at the University of Notre Dame

- Offers fresh perspectives on the history of Ireland and the Irish, bringing in the voices of commonly marginalised groups.
- Contains an interdisciplinary focus drawing on cutting edge research in history, archaeology, bio-archaeology, science, genetics, environmental history, material culture and cultural and literary studies.
- Examines not only the Irish living in Ireland but the many Irish diasporas who have settled all over world in four chronological sections.
- Accompanied by a four part BBC documentary with a global launch event.

Leadership from Bad to Worse

What Happens When Bad Festers

BARBARA KELLERMAN, Fellow, Center for Public Leadership, Harvard University

Leadership from Bad to Worse draws upon four case studies of bad leadership within business and politics to explain how leadership that is bad, invariably, gets worse and shows that the process of going from bad to worse tends to be steady, as opposed to hasty.

This book is intended, to serve as an early warning system for bad leadership. By breaking bad leadership and followership into phases their progression will be easier to predict and detect. And therefore easier to slow or, preferably, to stop before they turn toxic.

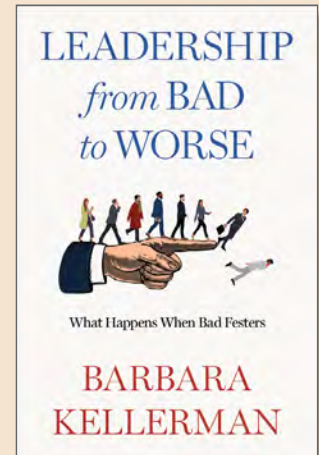

- Addresses a topic that is nearly entirely ignored even in the otherwise massive leadership literature.
- Draws attention to one of the most endemic, chronic problems facing the human condition: people stuck with leaders or managers who are in some way bad.
- Addresses the need to avoid easy solutions to difficult problems.

“Barbara Kellerman’s brilliant and blistering analysis is required reading and a cautionary tale to pull back from what is left of the brink.”

Julia Hobsbawm, Award-winning business writer and Bloomberg commentator

“For anyone concerned about the current state of leadership in business and society, this will show you the signs to look out - and correct - before it is too late.”

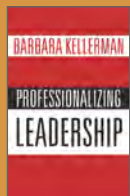

Herminia Ibarra, The Charles Handy Professor of Organisational Behaviour, London Business School

The New Industrial World

Manufacturing Development in the Course of the Globalization Age

LIVIO ROMANO, Senior Economist, Cassa Depositi and Prestiti (Italian National Promotional Institution), and **FABRIZIO TRAÙ**, Adjunct Professor of Industrial Economics, Luiss University, Rome

- Offers an analytical interpretation - in historical terms - of a specific phase of industrial development.
- Helps understand the reasons why manufacturing emerged only in some countries and not others in the globalisation years.
- Gives a comprehensive view of a whole range of issues usually treated separately, in particular the globalisation process and the problem of industrialisation in developing countries.
- Explains why emerging economies reached a lower industrialisation level, and a lower degree of manufacturing diversification, than advanced economies before starting to de-industrialise, and why manufacturing development cannot be taken for granted.

Capitalism and Crises

How to Fix Them

COLIN MAYER, Emeritus Professor of Management Studies and Visiting Professor at the University of Oxford

- Explores the failures of capitalism, providing fundamental insights for business practice, public policy, academic research, and teaching.
- Provides international, evidence based, practical examples of problems and solutions that are accessible, applicable, and compelling.
- Highlights how capitalism has caused multiple crises, including pandemics and climate change, and how it can solve them.

“A compelling journey that documents the baleful consequences when business pursues profit as an end to itself rather than as a means to address societal and ecological problems.”

Geoffrey Jones, Isidor Straus Professor of Business History, Harvard Business School

Rising Power, Limited Influence

The Politics of Chinese Investments in Europe and the Liberal International Order

Edited by **INDRAJIT ROY**, Senior Lecturer Global Development Politics, University of York, **JAPPE ECKHARDT**, Senior Lecturer International Political Economy, University of York, **DIMITRIOS STROIKOS**, Department of International Relations, London School of Economics and Political Science, and **SIMONA DAVIDESCU**, Senior Lecturer Public Policy Department of Politics, University of York

- Interrogates the interactions between state-society relations in China with state-society relations in Europe to explore resurgent China's global influence.
- Helps stakeholders to better understand the extent and limits of China's power based on its ability to shape global preferences and behaviour in its own favour.

"Based on solid empirical research, [this book] sheds light in an area too often dominated by speculation and lack of evidence."

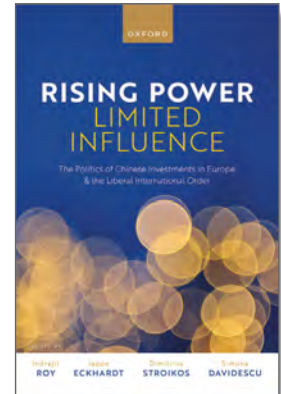

Kerry Brown, PhD, Professor of Chinese Studies and Director, Lau China Institute, King's College London

Big Science, Innovation, and Societal Contributions

The Organisations and Collaborations in Big Science Experiments

Edited by **SHANTHA LIYANAGE**, Associate of CERN, ATLAS Project, **MARKUS NORDBERG**, Head of Resources Development, IPT-DI, and **MARILENA STREITBIANCHI**, Vice-President, ARSCIENCIA

- A multidisciplinary perspective which draws upon physics and astrophysics scholars to explain the reasoning behind their work, and how such knowledge can be applied to everyday life.
- Contains interviews with Big Science experimental staff, providing information on the effective management of big collaborations.
- Gives insight into the experience of leading researchers of big experiments, revealing new approaches and epistemic cultures.

How Change Happens

Second Edition

DUNCAN GREEN, Senior Strategic Adviser, Oxfam

Human society is full of would-be 'change agents', a restless mix of campaigners, lobbyists and officials, both individuals and organisations, set on transforming the world. They want to improve public services, reform laws and regulations, guarantee human rights, get a fairer deal for those on the sharp end, and achieve greater recognition for any number of issues or simply be treated with respect. Unfortunately, there is currently no academic field which social activists can turn to for advice and inspiration.

How Change Happens bridges the gap between academia and practice, bringing together the best research from a range of academic disciplines and the evolving practical understanding of activists to explore the topic of social and political change.

- Provides a unique combination of the authors and Oxfam's on the ground experience with academic literature.
- This new edition explores the rising importance of digital technology in activism, reflecting its increased importance in the repertoire of social change, and debates over 'clicktivism' as a way of achieving real change.

"How Change Happens, ... points to a simple truth: that positive social change requires power, and hence attention on the part of reformers to politics and the institutions within which power is exercised. It is an indispensable guide for activists and change-makers everywhere."

Francis Fukuyama, Senior Fellow at Stanford's Freeman Spogli Institute for International Studies

"This is a gem of a book. ... All of us—practitioners and academics—who want a better world, and are willing to work for it, must read this book."

Bina Agarwal, Professor of Development Economics and Environment, Global Development Institute, University of Manchester

more information? www.oup.co.uk/academic/rights/translations

The Examined Run

Why Good People Make Better Runners

SABRINA B. LITTLE, Assistant Professor, Christopher Newport University

The Examined Run, asks whether running can be a laboratory for developing our character, examining the key ideas in virtue ethics—virtue, vice, exemplarism, moral emotions, and competition—and combining these with her experience in training and racing as an ultramarathon runner.

This book pushes back against the frequent conversations about ethics and sport that focus on the negatives, such as doping, cheating, or expressions such as ‘no pain, no gain’, and argues that a good athlete is not just one who avoids cheating—rather, they perform feats of perseverance and courage, and succeed by working to develop their natural capacities.

- Shows how ideas from moral philosophy can play an important role in running and athletics, and why being a good person can make us better athletes.
- Accessibly explains important ideas about virtue ethics and character development.
- Reveals how athletics and virtue are deeply connected.

“Little truly breaks new and exciting ground in her discussions of virtue, emotion, vice, moral exemplars, emotions, and many other topics, all in the context of being a runner. Highly recommended!”

Christian B. Miller, Author of *The Character Gap*

“A philosophically rich and practically relevant meditation on how running can form our character [...] Whether or not we think that an unexamined run is worth running, *The Examined Run* is definitely worth reading.”

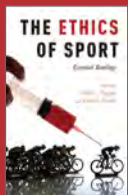

Michael Lamb, Executive Director of the Program for Leadership and Character, Wake Forest University

What Is It Like to Be a Bat?

THOMAS NAGEL, Professor Emeritus, Department of Philosophy and the School of Law, NYU

- A 50th anniversary edition of one of the most widely influential articles of 20th century philosophy.
- Offers an accessible introduction to the problem of how consciousness fits into the natural world.
- Includes an original essay by Thomas Nagel which describes Nagel's later thoughts about how to respond to the mind-body problem posed by *What Is It Like to Be a Bat?*.

Blooming in the Ruins

CARLOS ALBERTO SÁNCHEZ, Professor of Philosophy, San José State University

Mexican philosophy is a varied, dynamic resource for meaningful, distinctive wisdom to guide us through our lives. This book introduces readers to major themes in 20th century Mexican philosophy by incorporating stories from the author's own Mexican and Mexican-American experiences.

- Offers practical advice to readers while inviting them to learn more about Mexican philosophy.
- Connects the philosophical concepts to real-world experience through introductory anecdotes in each chapter.
- An intriguing guide for readers of all backgrounds.

PART OF THE GUIDES TO THE GOOD LIFE SERIES

Socialism

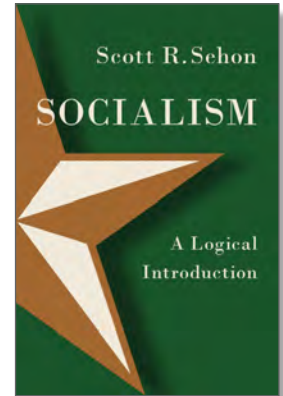

A Logical Introduction

SCOTT R. SEHON, Joseph E. Merrill Professor of Philosophy, Bowdoin College

- A clear introduction to one of the most crucial social movements of our time.
- Considers arguments from both academic discourse and popular discussions of socialism.
- Diagnoses problems with traditional conservative arguments against socialism.
- Argues that we should move in a strongly democratic socialist direction.

“With prose that is infectious, often witty, and crystal clear, Sehon provides powerful economic and moral arguments that will support those who are already leaning towards socialism and surprise those who are not.”

Susan Neiman, Author of Left Is Not Woke and Learning from the Germans: Race and the Memory of Evil

Different Beasts

Humans and Animals in Spinoza and the Zhuangzi

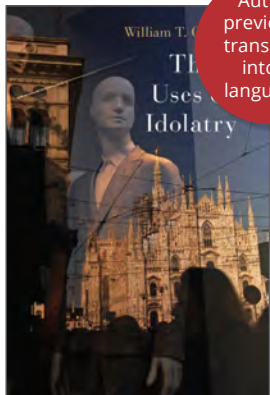

SONYA N. ÖZBEY, Professor in the Department of Asian Languages & Cultures and the Department of Philosophy at the University of Michigan

- Studies conceptions of human and animal identity as articulated in the ancient Chinese text the *Zhuangzi* and in the works of Benedict de Spinoza.
- Opens new paths for understanding Spinoza and the *Zhuangzi* while also developing methodological insights into the practice of cross-cultural comparative philosophy.
- Examines how, in these very different philosophies, notions of humanness and animality intersect with ideas about human unity and solidarity, social order, and social difference categories.

The Uses of Idolatry

WILLIAM T. CAVANAUGH, Professor of Catholic Studies and Director of the Center for World Catholicism and Intercultural Theology at DePaul University

- Offers a sustained and interdisciplinary argument that worship has not waned in our supposedly 'secular' world.
- Presents a sympathetic but critical account of how and why we sacrifice ourselves and others to gods of our own design.
- Offers a reinterpretation of Max Weber's work by challenging the common notion that he believed the modern world is disenchanted.
- Ranges across the fields of history, philosophy, political science, sociology, and cultural studies.

Can You be a Catholic and a Feminist?

JULIE HANLON RUBIO, Shea-Heusaman Professor Christian Social Ethics, Santa Clara University

- A post-#MeToo, #ChurchToo account of Catholic feminism.
- Uncovers ethical common ground between Catholicism and feminism on multiple political and social issues.
- Gives those who struggle to balance Catholicism and feminism a credible path to authentic belonging.
- Explores the potential for dialogue between Catholics and feminists through various lenses, such as sexual violence, spirituality, relationships, and what it means to be human.

The AI Mirror

How to Reclaim Our Humanity in the Age of Machine Thinking

SHANNON VALLOR, Baillie Gifford Professor in the Ethics of Data and Artificial Intelligence, University of Edinburgh

- A wide-ranging, prophetic, and philosophical case for what AI could be.
- Confronts the very real dangers of AI to human flourishing.
- Offers a way to think about AI that can reinvigorate the reader's sense of human agency and possibility.
- Encourages us to pursue technology that helps us recover our sense of the possible, and with it the confidence and courage to repair a broken world.

“Written with wit and charm, this book is a must-read for anyone interested in AI and our collective future.”

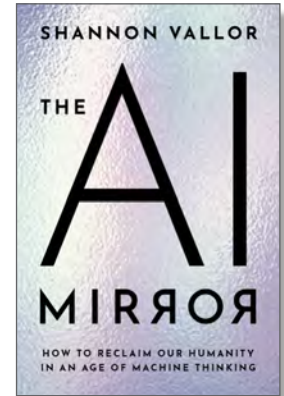

Kate Darling, MIT research scientist and author of *The New Breed*

AI Morality

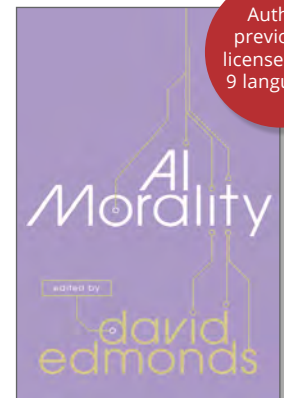

DAVID EDMONDS, Distinguished Research Fellow, Uehiro Centre for Practical Ethics, Oxford University

- Explores how AI is revolutionising our lives - and what moral problems it might bring.
- Discusses topics such as self and identity, politics and manipulation, the environment, the future of work, law, algorithms, and autonomous weapons.
- Rich with examples from contemporary society and imaginative projections of the future.
- Explains the issues in a lively and illuminating way, and takes a view about how we should think and act in response.

CHARGE

Why Does Gravity Rule?

FRANK CLOSE, Emeritus Professor of Physics, University of Oxford

Guiding readers deep into the subatomic world of quarks, electrons and neutrinos, *CHARGE* explores one of the deepest unresolved puzzles of fundamental physics: why are the charges of protons and electrons equal?

Exploring the forces that operate alongside electromagnetism, Close describes the colour and flavour charges which drive them and offers a tantalising hint to a deeper unity of all forces—the dream of grand unification theories.

The book considers our current state of understanding and includes in its investigation fundamental forces and particles and the implications of grand unification for the stability of matter. Close also regards the exciting experiments seeking hints that matter might be unstable, making this a compact, yet rich, account of current knowledge, an ambitious work pushing the field's boundaries, and the theoretical possibilities of the proton.

- Discusses one of the deepest puzzles at the frontier of physics.
- Leads readers through the subatomic world, with its exotic particles, quantum effects, and powerful forces.
- Observes our current understanding and the leading research exploring whether matter might be unstable.

“A little gem of a book. No one describes the building blocks of matter more clearly and delightfully than Frank Close.”

Jim Al-Khalili, Author of *The Joy of Science* and *The World According to Physics*

Why Ecosystems Matter

Preserving the Key to Our Survival

CHRISTOPHER WILLS, Professor Emeritus of Biological Sciences, Department of Ecology, Behaviour and Evolution, University of California San Diego

- Explores how interactions between species in an ecosystem drive evolution.
- Takes the reader through striking examples worldwide, showing the processes involved in the evolution of complex ecosystems into ecological cauldrons.
- Describes how the latest scientific research enables us to measure the evolutionary drivers of ecosystems.
- Shows how these techniques can be used to protect and repair our precious ecosystems and avoid the threat of a 'flip' to a new ecological equilibrium.

The Decarbonization Delusion

What 3.5 Billion Years of Biological Sustainability Can Teach Us

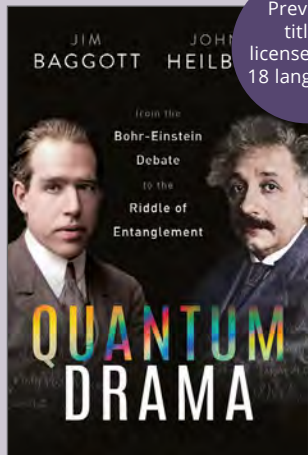

ANDREW MOORE, Freelance Science Writer and Communications Advisor

- Argues that we should use the way that life on Earth has employed carbon sustainably for millennia as a model for how humans can also use carbon sustainably.
- Discusses carbon's role in the inception of the universe and identifies the crucial ways in which biology uses carbon to create sustainable human economies on Earth.
- Asks readers to re-think their assumptions and approach sustainable energy development in a more scientific fashion.
- Draws on extensive research and original calculations, disproving common fallacies regarding carbon-based energy carriers and their alternatives.

Quantum Drama

From the Bohr-Einstein Debate to the Riddle of Entanglement

JIM BAGGOTT, Freelance science writer, and **JOHN L. HEILBRON**, Professor Emeritus of History, University of California, Berkeley

The definitive account of the great Bohr-Einstein debate and its continuing legacy.

The debate between Niels Bohr and Albert Einstein, about the interpretation and meaning of the new quantum theory, would soon become one of the most famous debates in the history of science. The confrontation raised the question: what, if any, limits should we place on our expectations for what science can tell us about physical reality?

As the landscape of physics was affected by geopolitical shifts, the debate was reignited by two new protagonists, David Bohm and John Bell. As they discovered that the answers could be found in a laboratory, new disciplines were established in the forms of quantum computing, teleportation and cryptography.

Quantum Drama reveals the influence of those who maintained these crucial discussions, and the endless nature of the debate around this fundamental question.

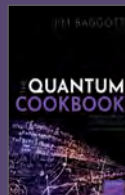

- Tells the narrative of the famous Bohr-Einstein debate and the fundamental question of what science can teach us about physical reality as a compelling drama.
- Draws on the results of extensive research into both the scientific literature and historical record, including first-hand accounts from figures at the heart of the debate such as Bohr and Heisenberg.
- Provides an accessible, authoritative account of the historical context and moral force of the debate and the long-lasting effects of it on physics today.

Designing More-than-Human Smart Cities

Beyond Sustainability, Towards Cohabitation

SARA HEITLINGER, Senior Lecturer in Computer Science, City, University of London, **MARCUS FOTH**, Professor of Urban Informatics, Queensland University of Technology, and **RACHEL CLARKE**, Course Leader, London College of Communication, University of the Arts London

- Argues that current approaches are too human-focused and that they need to be developed to work more harmoniously with nature.
- Draws on existing theory, policy, practice and speculative design about how cities may evolve, and illustrates key concepts responding to the relationships between humans and non-human others in urban spaces.
- Includes contributions from a diverse group of researchers and practitioners in fields such as urban planning, architecture, environmental humanities among other areas.
- Features examples of contemporary case studies across research and practice within smart city projects which have not previously been published.

Genetic Reconstruction of the Past

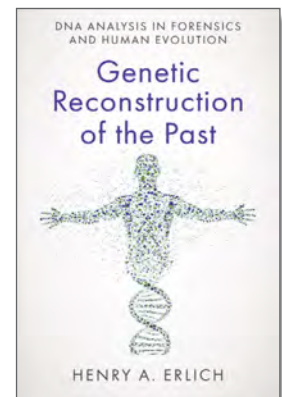

HENRY A. ERLICH, Research Emeritus at the Benioff UCSF Children's Hospital Oakland Research Institute

- Explores how DNA amplification has transformed forensic science and evolutionary biology.
- Offers a personal account of the development of a new DNA technology, polymerase chain reaction (PCR), and its application to criminal cases.
- Discusses the connections between DNA analysis in criminal cases and in evolutionary studies.
- Features an in-depth examination on how DNA analysis can be used to make inferences about historical events, both in the ancient and recent past.

Recovery from Schizophrenia

COURTENAY M. HARDING, retired Professor of Psychiatry and Rehabilitation, Boston University

- Employs research spanning three decades to examine how recovery and significant improvement from schizophrenia and other psychoses are possible.
- Discusses the need for the overhaul of funding, public policies, and program priorities in order to provide opportunities for those with a diagnosis of schizophrenia and other psychoses.
- Explains that innovative program designs from across the world are available to promote positive outcomes.

Psychosocial Occupational Health

An Interdisciplinary Textbook

JOHANNES SIEGRIST, Professor Emeritus of Medical Sociology, Centre for Health and Society, Heinrich-Heine-University Düsseldorf, and **JIAN LI**, Professor of Occupational Health, Department of Environmental Health Sciences, Fielding School of Public Health, University of California, Los Angeles

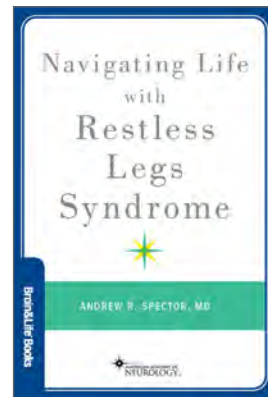

- Combines evidence from the fields of occupational medicine, social and behavioural sciences, and biomedical research.
- A comprehensive and interdisciplinary review of the associations of modern working conditions and health.
- Accessibly written, the book explores current challenges, such as economic globalisation, technological progress, and the ecological and pandemic crises.
- Addresses the training needs and competences of future and current professionals in the field of occupational health.

Enhancing Treatment Benefits with Exercise, Therapist Guide

Component Interventions for Mood, Anxiety, Cognition, and Resilience
Second Edition

MICHAEL W. OTTO, Director, Translational Research Program and Professor of Psychology, and **JASPER A. J. SMITS**, Professor and Department Liaison for Medical Affairs, The University of Texas at Austin

- Explores how exercise can be used to combat anxiety and depression using a step-by-step account of the benefits of exercise, its application to specific conditions, as well as recommended doses and durations.
- Provides an indispensable resource for practitioners looking to expand their therapeutic range to include exercise-based interventions.

PART OF THE TREATMENTS THAT WORK SERIES

Enhancing Treatment Benefits with Exercise, Workbook

MICHAEL W. OTTO, Director, Translational Research Program and Professor of Psychology, and **JASPER A. J. SMITS**, Professor and Department Liaison for Medical Affairs, The University of Texas at Austin

- Offers a fresh way to approach exercise and make the program work for individual lifestyles, including motivational strategies.
- Provides worksheets and activities for therapists and clients to complete the treatment program.
- Fully updated to reflect new research and organised in an easy-to-use, session-by-session format.
- Can be used in conjunction with the companion *Enhancing Treatment Benefits with Exercise – Therapist Guide*.

PART OF THE TREATMENTS THAT WORK SERIES

Coping after COVID-19

Cognitive Behavioural Skills for Anxiety, Depression, and Adjusting to Chronic Illness, Client Workbook

ABHISHEK JAYWANT, Clinical Neuropsychologist, **DORA KANELLOPOULOS**, Clinical Neuropsychologist, **LAUREN OBERLIN**, Assistant Professor, Weill Cornell Medicine, **STEPHANIE CHERESTAL**, Director, NYP-Westchester Behavioural Health Outpatient Dialectical Behaviour Therapy program, **CHRISTINA BUENO CASTELLANO**, Clinical Neuropsychologist, and **VICTORIA M. WILKINS**, Clinical Psychologist

- Includes worksheets and activities for therapists and clients to complete the treatment program.
- Can be used in conjunction with the companion *Therapist Guide*.

PART OF THE TREATMENTS THAT WORK SERIES

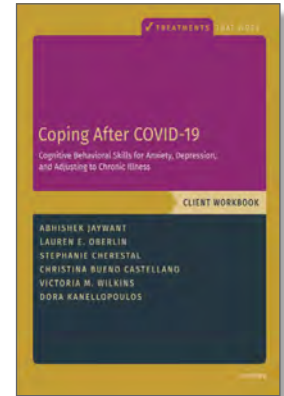

Coping after COVID-19

Cognitive Behavioural Skills for Anxiety, Depression, and Adjusting to Chronic Illness, Therapist Guide

Interpersonal Psychotherapy

A Global Reach

MYRNA WEISSMAN, Professor, Columbia University, New York State Psychiatric Institute, and **JENNIFER MOOTZ**, Assistant Professor, Columbia University, New York State Psychiatric Institute

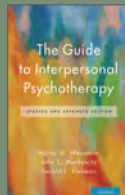

Exploring the rapidly expanding dissemination of Interpersonal Therapy (IPT), *Interpersonal Psychotherapy: A Global Reach* describes the development of new training, technologies, and the implementation of IPT across the world.

Spanning training considerations and the use of technology for application, the book also addresses the continuing evidence base of IPT and the certification of delivery within IPT, whilst offering insight from experts across 31 different countries across the globe.

This book also broaches how IPT can be adapted for different disorders, as well as how it can be applied across a variety of age groups and diverse communities, describing how it has been implemented among African American girls, Indigenous people, Latinos, refugees, sexual and gender minority individuals, those with perinatal depression, and veterans, among others.

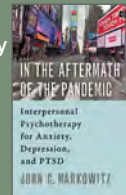

- Offers examples of different training models of IPT, including digital methods and telehealth.
- Contains case samples of IPT application in Asia, Africa, Europe, Middle East, North America, South America and Oceania.
- Provides adaptations and case examples for diverse populations across the lifespan, ranging from preadolescents to older adults.

EMBARK Psychedelic Therapy for Depression

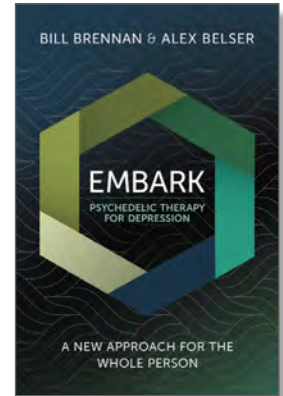

A New Approach for the Whole Person

BILL BRENNAN, Psychologist in the EMBARK psychedelic facilitator training program, and **ALEX BELSER**, clinical scientist, psychologist, and leader in psychedelic research

- A comprehensive guide to psychedelic therapy for depression, addressing gaps in existing models of psychedelic therapy.
- Contains leading-edge instruction from experienced professionals and incorporates the unique framework of the EMBARK model.

“Brennan and Belser’s remarkable manual offers an approach both visionary and practical. Their method recognizes the psychological, social, and spiritual aspects that are central to the psychedelic healing of depression, allowing the reader to discover the unique location for that therapist, that patient, and the medicine that connects them.”
