

Mental Illness

What Everyone Needs to Know®

Nikima M. Glatt, Cultivating Resilience and **Stephen J. Glatt**, State University of New York

- Written collaboratively by a scientist and a clinician, providing a unique perspective from both healthcare and psychiatric backgrounds
- Covers a broad range of mental illnesses, and emphasizes the commonalities that cut across diagnostic boundaries, rather than focusing extensively on any one particular disorder

Mental Illness: What Everyone Needs to Know® reflects the massive efforts being made by scientists and clinicians to better understand and treat mental disorders.

Electromyography in Clinical Practice

A Case-Based Learning Approach

Fourth Edition

Bashar Katirji, Case Western Reserve University

- Offers four detailed introductory chapters that acquaint the discipline and scope of the EDX Examination, including chapters on nerve conduction studies (NCS), needle EMG, specialized EDX testing, and EDX findings in neuromuscular disorders
- Comprises comprehensive presentations of 36 cases that encompass the most common disorders encountered in the EMG laboratory

Electromyography in Clinical Practice, now in its fourth edition, bridges the gap between theory and practice in electrodiagnostic (EDX) and neuromuscular medicine. The book begins with four introductory chapters on nerve conduction studies (NCS), needle EMG, specialized EDX testing, and EDX findings in neuromuscular disorders.

The Science of Repair

How People who Believe in Facts Can Build a Better Future

Gwen Ottinger, Drexel University

- Makes big ideas concrete through the stories of ordinary people engaged in scientific investigations
- Offers nuanced but actionable recommendations for researchers and research policymakers
- Shows how science can become the best version of itself

In *The Science of Repair*, Gwen Ottinger clarifies the role that research plays in combatting injustice and how it can be reparative. Examining the thirty-year history of communities' efforts to measure oil refinery emissions in the air they breathe, the author chronicles compelling ethnographies that have made restorative EJ possible.

Social Injustice and Public Health

Fourth Edition

Edited by **Barry S. Levy**, Tufts University School of Medicine

- The defining text on the sources and health consequences of social injustice and how to reduce these consequences
- Provides a broad, evidence-based review of how social injustice affects specific population groups and specific aspects of public health
- Includes numerous textboxes, tables, and figures to illustrate concepts and their application

The fourth edition of *Social Injustice and Public Health*, a completely updated edition of the classic text, is a comprehensive, evidence-based resource for understanding and addressing the profound impacts of social injustice on public health.
